

Bechir Ghouma

Dear Recruiter,

My name is Bechir Ghouma, a 25-year-old Full Stack Software Developer, driven by a passion for IT and technology. I am an ambitious individual constantly seeking to enhance my technical skills, evolve professionally to meet the demands of the market, and gain valuable experience in software development.

As a Full Stack Developer, I have had the opportunity to work with various technologies, including React.js, React Native, Node.js, Express, MongoDB, MySQL, GitHub, and Vanilla JavaScript. I also have hands-on experience in both solo and collaborative work environments. While I enjoy working as part of a team and have completed numerous projects with colleagues, I am equally effective working independently. For instance, I developed two freelance projects: an accounting software solution and a food delivery application.

In terms of education, I earned my high school diploma in Computer Science and am currently pursuing a degree in Computer Engineering at the Faculty of Science in Sfax. Additionally, I have gained valuable professional experience as an instructor at RBK for one year and as a UI/UX designer at GoMyCode.

Beyond my technical expertise, I hold a C2 level in spoken English on the CEFR scale, which enables me to communicate effectively in diverse, professional settings.

My enthusiasm for coding and software development drives me to embrace challenges and continuously strive for growth. I would be thrilled to bring my skills and passion to your team and contribute to the success of your organization.

Best regards,

Bechir Ghouma.
